## Technic Showcasing Advanced Metal Finishing Technologies at FABTECH 2023 in Chicago

**Cranston, Rhode Island, USA** - Technic, a global leader in advanced metal finishing technologies, is excited to announce its participation in North America's largest metal forming, fabricating, welding, and finishing event, FABTECH. The event will be held at McCormick Place from September 11 to 14, 2023. FABTECH serves as a premier 'one-stop shop' venue, bringing together world-class suppliers and showcasing the latest industry products and developments to meet the diverse needs of metal forming, fabricating, welding, and finishing industries.

Technic will be presenting its proprietary process chemistry, equipment, and controls that have garnered global recognition in the industrial, electronic, and decorative finishing sectors. Among the highlighted technologies and application developments, Technic will showcase its revolutionary **Spouted Bed® Electrode (SBE)**, a patented electroplating method designed for small components such as Electronic Connectors, Pins, Chip capacitors, and resistors.

**FABTECH**

A wide range of conventional equipment will also be on display, ranging from manual wet bench processing systems and laboratory-scale production workstations to advanced multi-hoist lines with various control features and options.

**New for 2023**, Technic will be proudly introducing its **Eco Product Line**, reflecting the company's unwavering commitment to environmental stewardship and social responsibility. The Eco Product Line focuses on developing and offering products that are safer, cleaner, and more economical while simultaneously promoting sustainability in manufacturing processes.

**Also on display**, **Cataphoretic Lacquers**, also known as electro-coating or e-coating, specifically catered to the decorative/functional metal finishing industry. These lacquers effectively provide plated parts with superior corrosion resistance, increased hardness, and high wear resistance, meeting the industry's stringent quality demands.

Technic's Technical Service Representatives and Equipment Process Experts will be readily available throughout the event to address queries and provide valuable insights on the extensive line of products available for Electronic, Industrial, PCB, and Decorative applications.

To learn more about Technic's innovative specialty chemicals and custom finishing equipment designed to meet unique application requirements, attendees are encouraged to visit **booth #D40555**.

**FABTECH 2023** promises to be an exceptional opportunity for industry professionals to connect with leading suppliers, explore cutting-edge technologies, and gain insights into the latest industry trends. Technic looks forward to welcoming visitors to its booth and sharing its expertise and innovations in metal finishing technologies.

**About Technic:** Technic is a globally recognized leader in advanced metal finishing technologies, offering proprietary process chemistry, equipment, and controls. With a commitment to innovation and customer satisfaction, Technic serves a diverse range of industries, including industrial, electronic, and decorative finishing.
