Technic France Completes Major Expansion in Amiens

Increased Product Range and Production Capacity Marks a New Era for Technic

Amiens, France – Technic, a leader in semiconductor materials production, is marking a new chapter in its growth with a major expansion to meet rising European demand. The company is proud to inaugurate Technic Ultra Pure, a state-of-the-art chemical plant in Amiens, France, that will allow Technic to meet the growing demand for bulk production and better serve its global customers.

Spanning over a 25,000 square meter area, Technic Ultra Pure includes three main buildings and is equipped with the latest industry 4.0 technologies, such as real-time monitoring and an ultra-trace quality control laboratory.

The facility also boasts specialized zones for handling hazardous materials, such as areas for solvents, flammable products, acids, and bases. Advanced safety measures and robust storage solutions, including several hundred cubic meters of underground storage and mixing tanks, ensure the safe management of chemicals while mitigating environmental risks.

“This expansion reaffirms our commitment to supporting the evolving needs of the semiconductor market in Europe and beyond. By increasing our production capacity and enhancing infrastructure, we are better positioned to meet rising demand, while maintaining the highest standards of safety and environmental responsibility.”

- Philippe Vernin, President of Technic France

The newly inaugurated chemical plant embodies Technic’s commitment to safety, operational excellence, and sustainability, as the company continues to invest in R&D and production projects focused on developing safer, more sustainable solutions for semiconductor manufacturing.

Technic Ultra Pure follows four existing plants and two R&D centers in France, confirming Technic’s continued leadership in the semiconductor materials industry, while driving innovation and maintaining high standards of safety and sustainability.
