Discover Technic's Innovations at SEMICON Europa 2024

Technic will be participating in **SEMICON Europa**, taking place from November 12-15, 2024 in Munich. This premier event serves as a vital hub for the semiconductor industry, bringing together key stakeholders, innovators, and experts from around the globe. With a focus on fostering collaboration and driving technological advancement, SEMICON Europa offers an unparalleled opportunity for industry leaders to connect and explore the future of semiconductor manufacturing.

Technic's participation this year is especially significant following the expansion of its operations in Europe. The company recently inaugurated a new chemical production facility in Amiens, France, which will allow Technic to enhance its semiconductor materials manufacturing capabilities across the region. This facility, spanning over a 25,000 square meter area, underscores Technic's commitment to innovation and growth within the semiconductor industry, as the company continues to scale up production to meet growing global demand.

At SEMICON Europa, Technic will showcase its advanced electroplating chemistry and custom-engineered equipment, essential tools for enhancing precision and performance in semiconductor manufacturing. These innovative solutions not only improve operational efficiency, but also align with global sustainability goals by minimizing environmental impact. Technic's commitment to innovation by developing safer, more sustainable chemical solutions positions us as a valuable partner for semiconductor manufacturers striving to achieve their operational and environmental objectives.

Our team of experts will be available at the event to engage with attendees, share insights on market trends, and discuss how our chemistries for semiconductor fabrication and packaging can bring value to your application.

We invite you to visit us at **Booth C1537** to discover how Technic's innovations are shaping the future of the semiconductor industry and to learn more about our commitment to delivering high-quality, sustainable solutions.
