Technic to Attend Record-Setting SEMICON Taiwan 2024

Taiwan - Technic will be participating in this year's SEMICON Taiwan, taking place from September 4-6, 2024. SEMICON Taiwan is set to achieve a record scale with over 1,000 exhibitors across 3,600 booths. This year's theme, **Breaking Limits: Powering the AI Era** will highlight how the semiconductor community collaborates to drive the unstoppable wave of AI innovation.

Technic will be showcasing its chemistry solutions for advanced semiconductor packaging at the event. Marketed under the name Elevate, Technic's electrodeposition chemistries are well respected for their innovation and high quality in applications such as RDL, pillars, microbumps, and LED packaging. The Elevate line includes **Elevate® Cu 3000**, a versatile process that can plate various types of features with excellent WID and WIW. It has a very stable additive package, and all inorganic and organic components are easily analyzed using Technic's Elevate Analyzer.

Technic also supplies several high-performance photoresist strippers for liquid and dry-film resists, as well as a full range of metal etchants and cleaners marketed under the names **TechniStrip®**, **TechniEtch**, and **Techniclean™**. For analytical controls, the **Technic RTA 3D** will be on display. The RTA has become the leading analytical control system for damascene copper processes and backend packaging applications, including controlling TSV and copper pillar processes.

SEMICON Taiwan is a vital platform that connects Taiwan with the global microelectronics community. The event will feature themed pavilions and innovation zones dedicated to green manufacturing, heterogeneous integration, materials, Taiwan localization, testing, and workforce development, along with new pavilions on AI, smart mobility, silicon photonics, and precision machinery to align with evolving market trends and demands.

Technic's participation underscores its commitment to staying at the forefront of semiconductor technology and innovation. By attending SEMICON Taiwan, Technic aims to showcase its latest advancements and forge new collaborations within the industry.

About Technic: For over 75 years, Technic has been a global supplier of specialty chemicals, custom finishing equipment, engineered powders, and analytical control systems to the semiconductor, electronic component, printed circuit board, industrial finishing, and decorative industries. Technic is also a major supplier of engineered metal powders to the solar industry.
