

FOR IMMEDIATE RELEASE

Technic Engineered Powders Division to Manufacture Mirror Grade Silver Nitrate Solution

Woonsocket, RI - Technic is proud to announce a new licensing partnership for the production of mirror-grade silver nitrate solution. Under the agreement, Technic will manufacture Solchem's silver nitrate solution, SOL405, which will be marketed under product code 90-300, at our Engineered Powders Division site in Woonsocket, Rhode Island.

Technic has a history spanning 80 years in manufacturing and supplying top-quality precious metal products. Our expertise extends to producing high-grade silver nitrate for various industries for over 30 years. Leveraging Solchem's technical expertise and Technic's extensive manufacturing experience, we are committed to producing a specific grade of silver nitrate solution tailored for silver mirroring applications in North America.

Solchem's technical specialists have rigorously evaluated and qualified Technic's production process, ensuring that product 90-300 meets the stringent standards required by the mirroring industry. This collaboration represents a significant addition to Technic's product portfolio, enabling us to supply high-quality materials to the North American market.

"We are excited to collaborate with Solchem GmbH to produce their high-grade silver nitrate solution. This partnership combines Solchem's exceptional technical expertise with Technic's robust manufacturing capabilities, ensuring that we deliver a superior product to meet the demands of the mirroring industry. We look forward to the opportunities this new product line will bring to our portfolio."

- Jim Frick, General Manager, Technic Engineered Powders Division

Technic looks forward to the success of this partnership with Solchem and to providing customers with superior silver nitrate solutions for their mirroring needs.

About Technic: For 80 years, Technic has been a global supplier of specialty chemicals, custom finishing equipment, engineered powders, and analytical control systems to the semiconductor, electronic component, printed circuit board, industrial finishing, and decorative industries. Technic is also a major supplier of engineered metal powders to the solar industry.

About Solchem: Solchem was formed in 2015 following the acquisition of a German plating solutions manufacturer. In 2018, Solchem expanded by acquiring Spraylat GmbH's mirror chemical business from PPG, establishing itself as a global player in electroless plating chemicals. Solchem focuses on sustainable innovations and promotes effective, high-quality, and cost-effective business models for plating customers, emphasizing carbon footprint reduction.
